

# COVER ALL THE BASES

## with Texas-Style Health Care Reform

The provisions of the Patient Protection and Affordable Care Act (ACA) aren't perfect, but it's the law. Rather than simply resist and delay, **it is time for Texans to roll up their sleeves and implement health care reform, Texas-style.**

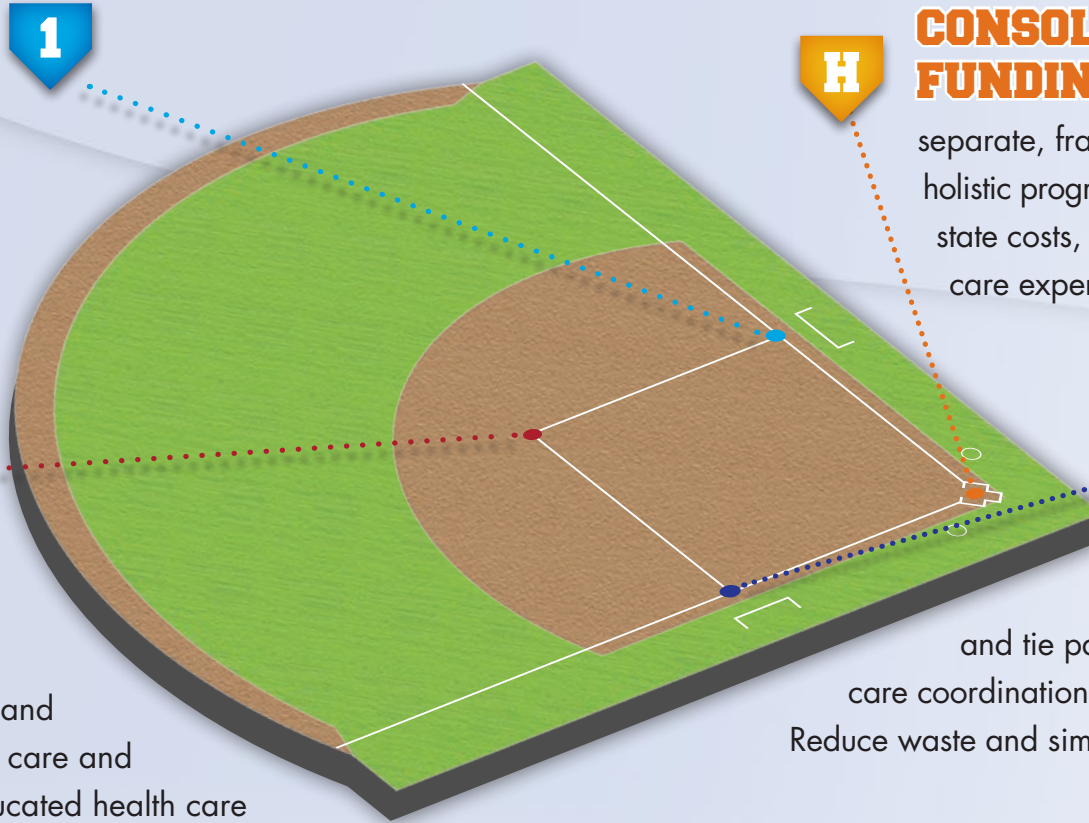

### COVER EVERYONE

with basic, common-sense benefit plans. The remaining critical steps will not work with six-million Texans uninsured. This includes an "exchange-like" market where everyone can buy health insurance at reasonable prices.

### BUILD PERSONAL ACCOUNTABILITY

with co-payments for services, the expectation that all newly enrolled individuals should pay something, and better transparency for both health care and insurance costs. Become better educated health care consumers and take responsibility for our own health.

### CONSOLIDATE PROGRAM FUNDING

by reducing the number of separate, fragmented programs. Develop holistic programs that control and reduce state costs, while improving the health care experience for all Texans.

### Transform the PROVIDER PAYMENT PHILOSOPHY

and tie payments to healthy outcomes, care coordination, and integrated delivery of care. Reduce waste and simplify payment administration.

A NEW HEALTHY TEXAS
